

Water Efficient Dishwasher Rebate Qualifying Products List

www.SouthPasadenaCA.gov | EnvironmentalPrograms@SouthPasadenaCA.gov

This list of dishwashers was created using Energy Star's Certified Residential Dishwashers List for the purpose of the South Pasadena Water Conservation Rebate Program. A standard-sized Energy Star certified dishwasher can save an average of 3,870 gallons of water over its lifetime and costs about \$35 per year to run.

For more information on the Energy Star Product Finder or to compare dishwasher types, visit www.EnergyStar.gov/productfinder. This list was modified to only show dishwashers available in the United States. Energy Star Most Efficient 2022 is a distinction that recognizes the top, few, most energy-efficient products available on the market (residents are not required to purchase the Energy Star Most Efficient 2022 to be eligible for this rebate).

In order to qualify for this rebate, you must be replacing a non-Energy Star dishwasher
